

**Your people need a plan for the best
AND worst of times.
Our people empower you to prepare.**

Planning for disaster is simple in theory: creating a mirror copy of your essential business data and storing it in a secure location, protecting you against catastrophic and unexpected loss. But the actual complexities involved in an effective disaster recovery plan result in escalating costs, impossible decisions, incomplete solutions, and frustrated, confused people.

That's where our people come in. We know that effective disaster recovery planning is about much more than technology. Through deep understanding of your individual business and needs, through comprehensive consultation from start to finish, and through our unparalleled planning, execution and testing experience, we ensure your critical systems are prepared for and protected against anything. With disaster recovery solutions through F3, you can:

INCREASE COMPLIANCE. All those rules and regulations from your industry and the government demanding a business continuity plan? Taken care of with a solution that satisfies the oversight people and your people.

ACHIEVE PEACE OF MIND. A good disaster recovery solution safeguards your data, and the future of your business with it. It helps you know and understand how to recover from that dreaded worst case scenario. It's your safety net that provides security and erases the anxiety.

SPEND ONLY WHAT YOU NEED. One of the most confusing aspects of disaster recovery planning is determining cost versus needs. F3 helps you cut through this clutter and discover the most cost-effective solution for your very individual business.

With the power of disaster recovery through F3, you can plan for the best and the worst. With the power of our people, you can do it with confidence and clarity. Contact us today to make the connection.
